Sample Outline
Computer Programming: New Foreign Language

I.   Introduction

II. CS Should Replace Foreign Language

=> CS is the new foreign language of the future and it's the only one we need to speak.

III. Don't Just Play On Your Phone… Program it! (Barack Obama)

- You can create anything with programming

V. Barber — "Computers are evil. They are taking our jobs."

- She says computers are taking over our jobs

- She claims she hates computers and that they are "Evil".

- I want to educate people on why she is like that so they could prevent themselves from
having a similar viewpoint.

VI. Store Run by App

- In Sweden… There is a store run by an automated app.

- It has 0 employees according to DigitalTrends.com

- Enjoy!!

VI. Conclusion

- Stop fighting the change!

- Embrace the change and educate the future generation!!

- Thank You!
